

# Orlando M. Romeo

oromeo@berkeley.edu || www.omromeo.com || www.linkedin.com/in/omromeo

---

## EDUCATION

---

- 12/2024 **University of California, Berkeley, CA**  
*Doctor of Philosophy, Earth and Planetary Science*
- 05/2020 **University of Maryland, College Park, MD**  
*Bachelor of Science (Honors), Physics - Magna Cum Laude*  
*Bachelor of Science (Honors), Astronomy - Magna Cum Laude*

---

## RESEARCH INTERESTS

---

- Heliophysics:** Solar wind dynamics, Coronal mass ejections, Wave-particle interactions  
**Planetary Science:** Crustal magnetization, Planetary magnetospheres, Planetary surfaces  
**Geospace:** Space physics, Space weather prediction, Radiation belt modeling  
**Instrumentation:** Electrostatic analyzers, X-ray optics, Magnetometers, Space mission design  
**Data Methods:** Time Series Analysis, Scientific modeling, Machine learning

---

## RESEARCH EXPERIENCE

---

- 01/2025 **Postdoctoral Researcher**, University of California Berkeley/SSL  
– Present **Parker Solar Probe (PSP) SWEAP Team**, *Advisor: Dr. Davin Larson*
- Producing solar wind electron parameters from the SPAN-E ESA on PSP
  - Studying Coronal Mass Ejections with in situ measurements close to the Sun
  - Developing 3D ray-tracing numerical algorithms for plasma instrument simulations
- 08/2020 **Graduate Student Researcher**, University of California Berkeley/SSL  
– 12/2024 **Parker Solar Probe (PSP) SWEAP Team**, *Advisor: Dr. Davin Larson*
- Calibrated SPAN-E ESA on PSP to produce solar wind electron parameters
  - Studied electron strahl scattering under varying solar wind conditions
  - Collaborated with other instrument teams to produce additional data products
- FOXSI-4 Sounding Rocket Mission**, *Advisor: Dr. Juan Camilo Buitrago-Casas*
- Assembled, tested, and integrated the Solar Aspect and Alignment System (SAAS)
  - Performed laser and X-ray alignment tests and simulations for the optics modules
  - Supported multiple stages of rocket integration at SSL, WSMR, & PFRR
  - Monitored solar conditions to capture real-time observations of an M-class solar flare
- InSight & Zhurong Surface Magnetometers**, *Advisor: Dr. Michael Manga*
- Conducted Monte Carlo simulations of crustal magnetic fields on Mars
  - Determined probable magnetic coherence scales and depths below each landing site
  - Developed geological magnetization models to study the Martian geodynamo history
- SWFO-L1 STIS Team**, *Advisor: Dr. Davin Larson*
- Characterized magnetic field emission from the STIS solid-state telescope
  - Tested Amptek pre-amps on the electronics board for each detector channel
  - Performed detector calibration tests with high-energy ion beams and radioactive sources to validate instrument performance
  - Monitored STIS conditions during spacecraft Thermal Vacuum Chamber testing

- 05/2019 **Planetary Undergraduate Researcher**, NASA Goddard Space Flight Center
- 09/2020 **MAVEN Proton Cyclotron Waves (PCWs)**, *Advisor: Dr. Norberto Romanelli*
- Identified PCWs near Mars using Fourier and minimum variance analysis on MAVEN magnetometer data
  - Characterized PCWs and shock processes upstream of the Martian bow shock based on solar wind and planetary properties derived from the MAG and SWIA instruments
- 08/2017 **Plasma Physics Undergraduate Researcher**, University of Maryland
- 06/2020 **Machine Learning Space Weather Forecasting**, *Advisor: Dr. Surjalal Sharma*
- Adapted detrending fluctuation analysis on Advanced Composition Explorer (ACE) space weather data to detect long-range correlations over several days
  - Forecasted space weather parameters using nonlinear and data-derived techniques (delay embedding, singular value decomposition, and nearest neighbor tree search)
- Magnetic Nanoparticle Antennas**, *Advisor: Dr. Dennis Papadopoulos*
- Simulated magnetization dynamics for nanoparticles in ferro-fluid antennas from the Stoner-Wohlfarth Model, including effects of magnetization precession, hysteresis, and quantum tunneling
  - Calculated nanoparticle magnetization states to determine energy efficient materials for CubeSat antennas in plasma environments
- 05/2017 **Space Physics Undergraduate Researcher**, Johns Hopkins University APL
- 08/2018 **RBSP Data-Driven Forecasting**, *Advisor: Dr. Aleksandr Ukhorskiy*
- Modeled radiation belt electron energy flux (eflux) from Dst index using particle diffusion theory
  - Filtered efflux measurements based on adiabatic invariants from the MagEIS and REPT instruments on the Van Allen Probes (RBSP) to calculate electron Phase Space Density (PSD)
  - Forecasted PSD from geomagnetic parameters and geosynchronous satellite observations, implementing nonlinear and data-derived techniques, such as delay embedding, singular value decomposition, and nearest neighbor tree search
- 01/2017 **Seismology Undergraduate Researcher**, University of Maryland
- 06/2017 **Seismic Wave Travel Times of Varying Frequencies**, *Advisor: Dr. Vedan Lekic*
- Cross-correlated observed travel times of seismic waves during the 2013 Sea of Okhotsk Earthquake with seismograms from the Preliminary Reference Earth Model (PREM) and Generalized Seismological Data Functionals (GSDF) method
  - Adapted Fourier and Gaussian wavelet analysis to filter the correlograms based on varying levels of frequency to calculate phase arrival times
  - Developed new framework for earthquake predictions with error bound estimation using significant deviations from PREM to characterize Earth's interior structure
- 09/2015 **Space Physics Intern**, Johns Hopkins University APL
- 12/2016 **Solar Wind and IMF Activity on SAA Intensity**, *Advisor: Dr. Robert Schaefer*
- Filtered UV spectrographic imaging from the Defense Meteorological Satellite Program (DMSP) based on photon counts and geographical, lunar and solar positions
  - Fitted photon counts in the South Atlantic Anomaly (SAA) region of Earth to a spherical harmonics model for daily SAA intensity
  - Correlated SAA intensity with solar wind speed and IMF activity from ACE

## TEACHING EXPERIENCE

---

### *Courses*

#### University of California Berkeley, Department of Earth & Planetary Science (EPS)

- Fall 2021      **EPS Graduate Student Grader, *EPS150 – Case Studies in Earth Systems***
- Reviewed weekly manuscripts related to Earth's carbon cycle and Martian hydrology
  - Graded weekly student abstracts summarizing each research paper
- Spring 2021      **EPS Graduate Student Instructor, *EPS50 – The Planet Earth***
- Instructed students during weekly three-hour lab sections on the study of minerals, rocks, geologic maps, and geological processes
  - Designed weekly lab assignments and created questions for midterm and final exams
  - Assisted students during weekly three-hour office hours and exam review sessions

#### University of Maryland, College Park, Department of Astronomy

- Fall 2019      **Astronomy Teaching Assistant, *ASTR310 – Observational Astronomy***
- Directed weekly two-hour research labs on image processing and data analysis
  - Aided students during two-hour office hours with programming troubleshooting
  - Graded weekly quizzes, lab activities, exams, and research projects

#### University of Maryland, College Park, Department of Physics

- Spring 2020      **Physics Teaching Assistant, *PHYS121 – Fundamentals of Physics I***
- Graded weekly quizzes/exams for 120 students focused on introductory physics
  - Held weekly one-hour discussion classes and two-hour office hours
  - Led two-hour lab sections using Microsoft Excel, Logger Pro, and physics demos
- Fall 2019      **Physics Teaching Assistant, *PHYS161 – General Physics***
- Graded quizzes/exams for 120 students focused on mechanics and particle dynamics
  - Assisted students during weekly two-hour office hours and exam review sessions
- Spring 2019      **Python Session Instructor, *PHYS205: Developing Essential Research Skills***
- Instructed Python coding sessions over two weeks to undergraduate freshmen
  - Provided an overall introduction to Python with basics of coding syntax and logic
  - Presented data science methods to visualize and analyze cosmic ray counts from the Bartol Research Institute Neutron Monitor Program
- Summer 2018      **Arduino Program Instructor, *UMD Physics Summer Girls Outreach Program***
- Led Arduino programming workshop for 60 female high school students
  - Introduced Arduino code, sensors, and circuits to monitor plant growth over 1 week
  - Presented methods to extract and visualize data for plant sustainability statistics

### *Student Mentoring*

#### University of California Berkeley, Space Sciences Lab (SSL)

- Spring 2025  
– Present      **Heliophysics Mentor, Student: Yuqi Zhang**
- Junior undergraduate student (Berkeley International Study Program) developed *CMEMoss*, a public python tool that performs general searches for spacecraft conjunctions with CME trajectories
- Summer 2025      **ASSURE REU Mentor, Student: Joseph Byrnes**
- Junior undergraduate student simulated spacecraft electrostatic charging in various space plasma environments using *SPIS* to support flight calibration and future mission design

- Summer 2024 **FOXSI-5 SAAS/Optics Mentor, Student: Danny Sun**
- Graduate student improved the SAAS instrument and performed optical alignment tests for the FOXSI-5 sounding rocket mission
- Summer 2023 **ASSURE REU Mentor, Student: Elyas Ahmed**
- Sophomore undergraduate utilized machine learning techniques (PySR) to characterize solar wind electron strahl scattering observed by PSP
  - Ahmed, E. *et al.* (2023). Machine Learning for Electron Distributions Observed by PSP. *AGU Fall Meeting Abstracts*, SH31D-3005.
- Summer 2022 **ASSURE REU Mentor, Student: Kyla Giron**
- Sophomore undergraduate investigated a potential Earth to Sun connection by studying possible asymmetries in flare and CME production on the Sun
  - Giron, K. *et al.* (2022). Investigating a Possible Earth to Sun Connection - Can the Earth Affect the Sun. *AGU Fall Meeting Abstracts*, ED35D-0579.

## University of California Berkeley, Department of Earth & Planetary Science (EPS)

- Fall 2023 – Spring 2024 **EPS Graduate Student Mentor, EPS Graduate Mentoring Program**
- Mentored three first-year graduate students in the EPS department
  - Established and tracked short/long term goals for students over academic year
  - Advised on navigating graduate school, research, and networking

## SELECT AWARDS & CERTIFICATIONS

- 2024 **Certification of Heliophysics Mission Design School – NASA/JPL**
- 2023 **Group Achievement Award for Parker Solar Probe Team – NASA**
- 2023 **Certification of Heliophysics Summer School – NASA/UCAR**
- 2022 **FINESST Fellowship Award (Heliophysics Division) – NASA**
- 2022 **Certification of Solar Orbiter Summer School – ESA/CNES**
- 2022 **SSL Robert P. Lin Graduate Fellowship – University of California, Berkeley**
- 2022 **Travel Award for SHINE 2022 Workshop – SHINE**
- 2019 **William M. MacDonald Physics Scholarship – University of Maryland**
- 2017 – 2020 **Group Award for SPS Outstanding Chapter (Annual) – AIS SPS**
- 2016 – 2020 **JHU APL Academic Merit Scholarship (Annual) – JHU APL**
- 2016 – 2020 **Angelo Bardasis Physics Scholarship (Annual) – University of Maryland**

## PRESENTATIONS (First Author)

---

### International – Oral

- 2024 American Geophysical Union Fall Meeting, *Overview of PSP Electron Observations from 10 to 100 Solar Radii*, Washington D.C., USA
- 2024 45th COSPAR Scientific Assembly, *Near-Sun In Situ & Remote Sensing Observations of a CME and its Effect on the HCS*, Busan, South Korea

### International – Poster

- 2023 American Geophysical Union Fall Meeting, *Determination and Calibration of Solar Wind Electron Moments Observed by PSP*, San Francisco CA, USA
- 2023 16th International Solar Wind Conference, *Determining the Anatomy of an ICME by Relating Remote Sensing and In Situ Observations Within 13 Rs*, Pacific Grove CA, USA
- 2022 American Geophysical Union Fall Meeting, *Characterization of Solar Wind Strahl Electron Scattering Observed by PSP*, Chicago IL, USA
- 2022 44th COSPAR Scientific Assembly, *Characterization of Strahl Electron Scattering in the Solar Wind Observed by PSP*, Athens, Greece
- 2022 Solar Orbiter Summer School, *Solar Wind Electron Distributions as Observed by PSP*, Sète, France
- 2021 American Geophysical Union Fall Meeting, *Characterization of Strahl Electron Scattering in the Solar Wind Observed by PSP*, New Orleans LA, USA
- 2019 American Geophysical Union Fall Meeting, *Solar Longitudinal Variability of Waves at the Local Proton Cyclotron Frequency*, San Francisco CA, USA

### National – Oral

- 2025 JHU/APL Parker Solar Probe Fourth Annual Conference, *Evolution of Electron Distributions During the March 13, 2023, ICME Observed by PSP*, Laurel MD, USA
- 2023 JHU/APL Parker Sixteenth Science Working Group Meeting, *CME Anatomy from Remote Sensing Observations and In-situ Measurements near 13 Rs*, Pasadena CA, USA

### National – Poster

- 2022 JHU/APL Parker Solar Probe Second Annual Conference, *Characterization of Strahl Electron Scattering in the Solar Wind Observed by PSP*, Laurel MD, USA
- 2019 AIP/Sigma Pi Sigma Physics Congress, *Seasonal Variability of Waves near the Proton Cyclotron Frequency Upstream from Mars*, Providence RI, USA
- 2019 MAVEN Project Science Group Meeting, *Seasonal Variability of Waves near the Proton Cyclotron Frequency Upstream from Mars*, Boulder CO, USA

### Institutional – Oral

- 2025 University of California, Berkeley Space Sciences Seminar, *Exploring the Inner Heliosphere with Novel in situ Measurements*, Berkeley CA, USA
- 2025 Parker Solar Probe Electron Working Group Meeting, *Calibration of the SPAN-E Instruments on Parker Solar Probe*, Virtual
- 2022 Space Sciences Lab Robert P. Lin Fellowship Seminar, *Electron Distribution Evolution near the Sun Observed by PSP*, Berkeley CA, USA
- 2018 University of Maryland Astronomical Observatory Open House, *Changes in Brightness for Cataclysmic Variables in Different Galactic Regions*, College Park MD, USA
- 2018 Johns Hopkins University APL Student Expo, *Data Driven Forecasting Model of Radiation Belt Intensities*, Laurel MD, USA

### Institutional – Poster

- 2019 NASA Goddard Space Flight Center Student Poster Expo, *Seasonal Variability of Waves near the Proton Cyclotron Frequency Upstream from Mars*, Greenbelt MD, USA
- 2017 University of Maryland Physics Research Showcase, *Seismic Wave Travel Times at Varying Frequencies*, College Park MD, USA
- 2016 Science and Math Academy Symposium, *Correlation of Solar Wind and IMF Activity on SAA Intensity*, Aberdeen MD, USA

## GRANTS & CONTRACTS

---

### *Funded*

- 09/2025 **The Superhalo Enigma: Characterizing Energetic Electrons in the Inner Heliosphere** (Funded by ISSI Teams) – Trotta (PI), Romeo (Collaborator)
- 08/2022 **Determination of Processes that Control Electron Distribution Evolution near the Sun as Observed by PSP** (Funded by NASA FINESST) – Larson (PI), Romeo (Graduate Student)

### *Under Review*

- 04/2026 **Multi-Scale Coherence of Martian Crustal Fields: Constraints on Dynamo History and Surface Evolution** (Funded by NASA) – Romeo (PI)
- 01/2026 **The Lunar Particle Investigation with Neutrons for Environmental Monitoring** (Funded by NASA) – Alnussirat (PI), Romeo (Deputy PI)
- 01/2026 **Investigation of Particle Acceleration in Impulsive Solar Flares using Solar Orbiter and Parker Solar Probe Observations** (Funded by NSF) – Alnussirat (PI), Romeo (Postdoc)
- 06/2025 **Student Electron Electrostatic analyzer (SEE): The Student Collaboration Instrument for HelioSwarm** (Funded by NASA) – Whittlesey (PI), Romeo (Co-I)

## SERVICE & OUTREACH

---

### Professional

- 2025 NASA ROSES Solicitation, *External Reviewer*
- 2024 NASA ROSES Solicitation, *Executive Secretary*
- 2024 The Astrophysical Journal, *Reviewer of 1 manuscript*
- 2024 Geophysical Research Letters, *Reviewer of 1 manuscript*
- 2022 The Astrophysical Journal, *Reviewer of 1 manuscript*
- 2022 Heliophysics 2050 Workshop: Space Physics, *Executive Secretary*
- 2021 AGU Fall Meeting Parker Solar Probe Session, *Volunteer Chair*
- 2020 Intersect: The Stanford Journal of STS, *Reviewer of 1 manuscript*

### Community

- 2025 – Present California Academy of Sciences, *Data Analysis Volunteer*
- 2025 SSL ASSURE REU Program, *Poster Judge*
- 2024 California Academy of Sciences SuperNatural Event, *Science Volunteer*
- 2024 SSL ASSURE REU Program, *Poster Judge*
- 2023 SSL ASSURE REU Program, *Guest Speaker on Planetary Environments*
- 2022 SSL ASSURE REU Program, *Student Application Reviewer*
- 2022, 2023 California Academy of Sciences, *Science Volunteer*
- 2020 UMD SPS Group Meeting: Python Basics, *Lead Python Workshop Instructor*

2019	UMD Society of Physics Students, <i>President</i>
2019	Sigma Pi Sigma Physics Congress, <i>UMD Booth Volunteer</i>
2019	UMBC SPS National Zone 4 Meeting, <i>Lead Python Workshop Instructor</i>
2018	UMD SPS National Zone 4 Meeting, <i>Lead Arduino Workshop Instructor</i>
2017, 2018	UMD Society of Physics Students, <i>Vice President</i>

## Media Outreach

2024	Science Article Author, <i>UCB/SSL article on FOXSI-4 rocket launch</i>
2023	Press Release on <i>Romeo et al. 2023</i> , <i>JHU/APL article and multiple news outlets</i>

## PROFESSIONAL SKILLS

---

### Programming & Software

- |          |           |            |
|----------|-----------|------------|
| • Python | • Julia   | • UNIX     |
| • IDL    | • Arduino | • Git      |
| • MATLAB | • Java    | • HTML/CSS |

### Data Methods

- |                        |                                       |                         |
|------------------------|---------------------------------------|-------------------------|
| • Data Pipelines       | • Machine Learning & AI               | • Algorithm Development |
| • Data Visualization   | • Scientific Modeling                 | • Statistical Methods   |
| • Time Series Analysis | • Numerical & Monte Carlo Simulations | • Code Optimization     |
| • Signal Processing    |                                       | • Parallel Processing   |

### Instrumentation & Lab Experience

- |                           |                   |                             |
|---------------------------|-------------------|-----------------------------|
| • Electrostatic Analyzers | • Oscilloscopes   | • Circuit Design & Testing  |
| • Magnetometers           | • Raspberry Pi    | • Optics Alignment          |
| • Solid State Telescopes  | • Vacuum Chambers | • Magnetic Characterization |
| • Observatory Telescopes  | • 3D Printing     | • Radioactive Sources       |

### Soft Skills

- |                       |                      |                      |
|-----------------------|----------------------|----------------------|
| • Public Speaking     | • Team Leadership    | • Event Coordination |
| • Community Outreach  | • Student Mentorship | • Scientific Writing |
| • Team Collaborations | • Project Management |                      |

### Languages

- |                    |                        |                      |
|--------------------|------------------------|----------------------|
| • English (Native) | • Italian (Proficient) | • Spanish (Beginner) |
|--------------------|------------------------|----------------------|
-
